## Maximizing Space Efficiency & Productivity

Understanding how to be more efficient and productive with your company's resources can drastically increase bottom line profits.

Southwest Solutions Group® designs and installs industrial material handling storage systems to optimize the flow of materials through your facility and increase efficiency while decreasing waste. Our dedicated team of professionals have been designing and installing innovative storage systems since 1969. Call us today 1-800-803-1083 to find out how we can make your business more efficient.

### Mobile Bulk Racks

By limiting aisle space, heavy duty mobile bulk rack systems can either free up floor space or double your current storage capacity.

### Vertical Lift Module (VLM)

Vertical lifts make use of valuable overhead space while optimizing productivity & inventory control. Reduces lost parts, stock outs, & surplus inventory.

### Mezzanines

Add valuable space to your facility with a mezzanine system. Strong enough to hold the heaviest loads and flexible enough to relocate when needed.

### Vertical Carousels

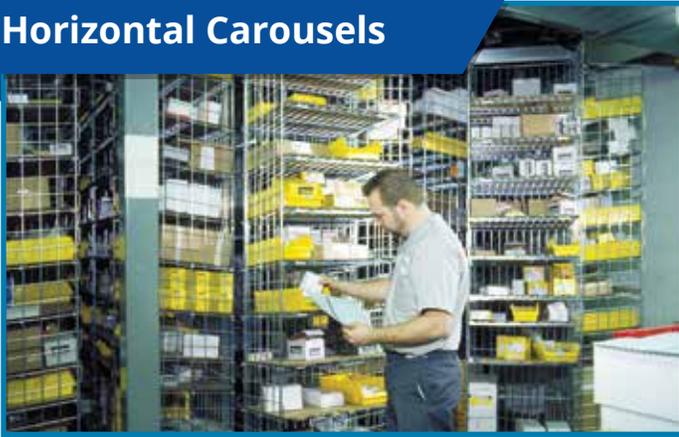

Vertical carousels are excellent for small part picking operations. In most applications, productivity can be increased by 60%. Inventory management is automated and dynamically updated with every pick/put.

### High-Density Shelving

Stationary aisles take up as much as 60% of warehouse floor space. Convert the wasted aisle space into either more capacity or convert the space to revenue generating activity without sacrificing access to inventory.

## Horizontal Carousels

This automated storage system will make your facility more productive and space efficient. Shelves rotate horizontally to bring parts to the operator, eliminating travel time and reducing picking errors.

## Wire Partition Cages

Protect your materials with modular wire partition security enclosures that require fewer parts to assemble and are easy to install and relocate when needed.

## In-Plant Modular Office

Create office space without expanding the walls of your facility. Save costs by only heating and air conditioning the office portion of your warehouse with an in-plant modular office.

## Compact Pallet Racks

Compact pallet racks can cut your floor space in half by mobilizing rows of pallets with the push of a button, even remotely from a fork truck. Reduce floor space dedicated to pallet storage without giving up 100% accessibility.

## Specialty Carousels

Specialty vertical carousels create automated storage solutions for heavy or difficult to handle items such as textiles, tires, wire spools, print cylinders, and more.

## Since 1969

Our team of sales engineers, staff, and certified installation technicians are committed to serving your business with excellence. Our promise is backed by 10 offices covering a 12-state region to provide continued service and parts after your initial installation.
