LARGE Diameter Fan

Large Diameter Fans with Tubercle™ Technology is a green power breakthrough which allows our High Volume Low Speed (HVLS) fans to deliver previously impossible levels of performance.

Rotor Power Blade Profile

Five Bladed Design
Inexpensive operation
Very Low Decibel Level
Consumes 20% Less Power
Unparalleled Blade Angle means more air
Simply the best performing fan on the market

Outdated Air Foil Technology

8' to 24' Diameter Available

These HVLS fans are simply outstanding when compared to what was previously state-of-the-art fans. We are proud to acknowledge that no other blade can outperform a Tubercle Technology™ blade when it comes to generating substantially greater lift while reducing drag.
