

High-Density Mobile Storage

MANUAL SYSTEMS

Storage Solved®

MOBILE CARRIAGE SYSTEMS

By mounting shelving units and storage cabinets on wheeled carriages that travel on rails, Spacesaver High-Density Mobile Storage Systems eliminate the need for multiple fixed aisles, freeing floor space for other more productive uses.

Standard Carriage Length Spacesaver Manual System carriages are available in standard lengths up to 16 feet (4.8m). Greater carriage lengths are possible, depending on system load factors.

Load Carrying Capacity Each Manual System carriage has a minimum load carrying capacity of 1,000 lb. (1,500 kg) per linear foot (meter). Your local Area Contractor can provide weight analysis and offer structural strategies to accommodate heavier system floor loads.

Flexible Rail Layout By adjusting rail size, spacing and orientation, floor loads can be optimally distributed at practical bearing points.

Welded-Steel Uniframe Carriage The welded-steel construction of Spacesaver carriages helps ensure that they will retain their alignment, eliminating binding, racking and misalignment of carriage and shelving. Their rigid, uniframe design has no exposed fasteners to loosen or break.

Hardened Steel Wheels And Rails Carriage wheels and rails are fabricated out of hardened steel and precision-machined for maximum strength and system life.

One-Piece Structural Rail System Available one-piece rail systems have no butt joints or welds. Their tongue-and-groove design restricts lateral movement and provides greater structural rigidity.

Fully-Grouted Rails All rails are fully supported and grouted to evenly distribute system weight. They are not installed using shims, which can cause carriage rails to flex and the system to malfunction. Modular rail and floor systems are also available.

Flexible Guidance Systems To reduce friction and facilitate smoother tracking, Spacesaver carriages are available with a variety of guidance systems. Your local Area Contractor will help you select the system best suited for your application.

Recessed Carriage/Welded Shelving Uprights Spacesaver carriages are designed for maximum stability. Their welded steel uprights and recessed mounting of shelving and cabinets enhance the structural integrity of the system. Storage housings become an integral part of the carriage, ensuring that they won't shift position or lose their alignment.

Anti-Tip Protection Built-in anti-tip devices can be engineered to comply with the requirements of all seismic zones, providing an extra measure of system stability and safety – even in areas prone to earthquakes.

Low Profile Rail Design The low-profile design of Spacesaver rail systems is engineered to mount flush with the finished floor. To ensure a proper match with the rest of their environment, system decks and ramps can be covered with virtually any flooring material.

Controlled Access Unauthorized access to any or all aisles can be prevented with optional security locks which allow individual carriages or the entire system to be key-locked in closed-aisle position as desired.

ADA Compliant To accommodate the personal limitations of individual users, Spacesaver Manual System floors and ramps can be configured to comply with ADA accessibility requirements.

SHELVING AND CABINETS

Wide Choice Of Housings Almost any type of storage housing can be mounted on Spacesaver mobile carriages, including your own existing shelving and cabinets.

Unlimited Shelving Options/Storage Accessories Beyond basic cabinetry, Spacesaver offers you a large assortment of case-type, four-post and cantilever shelving options, as well as drawers, bins, trays, lateral files, doors, industrial rack shelving and a broad range of storage accessories. They can be designed to accommodate virtually anything you wish to store.

Ability To Reconfigure/Expand System As your storage needs change, Spacesaver shelving and cabinets can typically be reconfigured or expanded to accommodate them.

Heavy-Duty Shelving Construction For added strength, Spacesaver shelving and cabinets are fabricated using heavy-gauge, cold-rolled steel and extensively reinforced for increased rigidity, improving their ability to support greater shelfloads.

Wide Array Of Design Options A wide range of colors, finishes and end-panel materials provides you with design options limited only by your imagination.

Durable Paint Finishes Spacesaver's powder-coat paint finishes are extremely durable, exceeding the stringent scuff, scratch and chip requirements of the American Library Association.

STORE VIRTUALLY ANYTHING, AND DO IT IN LESS FLOOR SPACE

In many applications, Spacesaver High-Density Mobile Storage Systems are three times more space-efficient than conventional filing and shelving at half the cost.

Regardless of their size, weight or shape, virtually any type and variety of materials can be stored using a Spacesaver High-Density Mobile Storage System. Not only that, they can be stored in less floor space, reducing your building lease and construction costs.

Spacesaver is the recognized leader in high-density mobile storage, with more installations than all other manufacturers combined. We have designed systems to fit almost every situation.

Spacesaver High-Density Mobile Storage Systems have been installed in offices, hospitals, banks, libraries, schools, museums, archives, factories, warehouses, laboratories, government agencies and military bases, as well as many other uniquely demanding environments.

Drawing on this vast experience, we provide each customer with a storage solution that is custom-configured to meet their specific needs. Having designed and installed more than 85,000 successful mobile systems for customers with a wide range of individual requirements, chances are we have already solved a storage problem similar to yours.
