

SOUTHWEST **SOLUTIONS** GROUP
innovative storage solutions

FOR MEDICAL SUPPLY AND HEALTHCARE

medical supply logistics + StockBox™

MATERIALS MANAGEMENT

We know people come first, and patient care is always the priority. We know supplies are necessary—for both hospital and patient survival.

And we know how to store, move and manage those supplies so that patient care is never interrupted, and service is never compromised.

PHARMACY STORAGE

Our supply management process accounts for pharmacy supply storage, as well. We offer modular systems that house bulk, unit dose, IV, robot-ready and outpatient pharmaceutical supplies.

PATIENT FLOOR STORAGE

Southwest Solutions Group eliminates inefficiencies in patient room and patient floor storage by building up customized and adaptable systems that allow for easy supply storage, access and transfer.

SUPPLY TRANSFER

To facilitate a seamless supply transfer, we use carts that are designed for and fit the same bins as the storage units in patient rooms and on patient floors—so that supply swaps and restocks are quickly carried out in a single trip.

StockBox™ automates inventory management; eliminates manual counting and stock-outs; right-sizes inventory levels; reduces waste from product expiration; improves space utilization; and decreases overhead costs.

Specialty Storage

Healthcare Furniture

Modular Casework

Headwalls

Signage & Wayfinding

Office Furniture

turnkey solutions

complete product packages for healthcare facilities

Patient rooms

Administrative offices
