Secure Solutions That Get The Job Done

Secure Solutions That Get The Job Done

GSA Contract Information

Multimedia Office Cabinets, Displays & Filing Systems, Powered Rotary Files (High Density Filing, Record Keeping Equipment). FSC Class: 7403
- [Lektiever ELF 115, 120, 125](#)
- [Megamat Vertical Carousel](#)
- [Shuttle Vertical Lift Module](#)
50 Contiguous States & The District of Columbia

A high level of security and control is common on military bases – and the same goes for the materials stored and managed on base. From weapons to high value assets to personnel and medical records, secure storage is a necessity. Kardex Remstar offers a broad selection of automated storage and retrieval solutions specifically designed for military use; providing secure storage and quick access times in a minimal footprint.

Productivity & Ergonomics

All Kardex Remstar solutions deliver stored goods directly to the operator at an ergonomic level, eliminating time spent walking, searching, bending and reaching to retrieve stored items, leaving more time for picking. Kardex Remstar products are ergonomically designed to meet the Americans with Disabilities Act (ADA).

Storage

Make it simple! We can help you simplify your operations, save storage space and increase your income.

Inventory control and higher availability of your spare parts, picking accuracy and inventory security – that is what matters. Kardex Remstar can help you eliminate time otherwise wasted searching for misplaced or out-of-stock inventory. And all this in a highly-densified storage environment.

Our solutions are scalable and flexible to change with your business. Easily reconfigure trays and carriers to maximize product density or relocate systems within your facility.

Shuttle XP

High-density storage in a compact footprint

The Shuttle XP has been designed to meet a broad range of storage and retrieval application requirements in manufacturing, distribution, retail and warehouse operations. The combination of storage density, flexibility, effectiveness and security makes it a unique storage solution. Trays are automatically delivered to the access opening at the push of a button or a scan of a bar code. The device is modular in its construction allowing the height and number of access openings to be adjusted post construction. By utilizing existing ceiling height, up to 85% of occupied floor space can be recovered. The height of each tray is automatically scanned to find the ideal storage location within the system using the least amount of possible space.

Megamat RS

Maximum storage space on a minimal footprint

Kardex Remstar has thoroughly refined the Megamat system, which has been proven over decades of use. The compact design ensures maximum storage space using minimal floor space. Shelves or drawers rotate up or down via the shortest path to automatically deliver stored items to an operator at an ergonomically positioned work station. Every Megamat RS can be used as a standalone solution or integrated with software.

Case Study: secure storage for military weapons

The Customer

The Gun Smith Shop at Lackland AFB stores more than 50 different handguns, rifles, shotguns, automatic weapons, etc. The amount of work flowing into this facility is based on actual need, not schedule. Some days there have been as many as 20,000 M16 rifles coming into the facility for storage, on other days there are no shipments.

1

Task definition

The Gun Smith Shop at Lackland AFB aimed to improve their inventory management while saving floor space.

2

Solution

Two vertical carousels with roll-out drawers store \$2.6 million dollars of inventory, 3,577 SKUs.

3

Advantages at a glance

- Saved 86% floor space
- Increased security
- Improved ergonomics
- Increased productivity

4

Scope of delivery

- 2 Vertical Carousels
- 70 Rollout Drawers Each

Software Solution Power Pick Global

Flexible Warehouse Management Software for intralogistics solutions.

Power Pick Global is a user friendly Warehouse Management Software designed to enhance intralogistics solutions by providing complete inventory management. Combining dynamic storage systems with Power Pick Global maximizes storage density, reduces pick times for greater productivity and increases pick accuracy.

The software can optimize space within the unit, create pick sequences, prevent out of stock inventory shortages and provide easy real time reporting. With a modular structure, Power Pick Global can meet a customer's requirements – today and in the future.

It can be tailored to various requirements and meets the highest quality standards. Designed as a base package with multiple add-on options, Power Pick Global can be customized to meet the exact needs of each application.

Why choose Power Pick Global?

Efficiency

Power Pick Global helps lower processing times, sequences order picking and assists with time optimized unit movement to increase throughput.

Accuracy

From standard validation via barcode, handheld scanner, weight control or pick to light technology, Power Pick Global

reduces picking errors, increasing accuracy to up to 99.9 %.

Security

Individual user and group rights can be controlled and managed, each transaction can be tracked.

Integration

Based on the latest windows technology, Power Pick Global can be easily integrated with your current ERP or host system.
