

WALL SYSTEMS • PANELS • BENEFITS

**SAVE TIME:**

Initial quotes are usually turned around in 1-2 days. Once ordered, detailed approval drawings are supplied in 1-3 days. After the drawings are approved it takes about 3-4 weeks for manufacture and depending on your location a few days for delivery. This means modular offices are typically installed around 5-6 weeks after they are initially quoted. Installation itself is quick meaning minimal down time for the end user. There is little to no cutting or painting since nearly all the work was done at the factory.

**FLEXIBILITY:**

Starting with the initial design stage we can work within your space constraints and around your obstructions down to the fraction of an inch. We can also provide an integral load bearing roof so there is no need for a separate mezzanine. Not only do our wall systems install quick and easy but they can be relocated or reconfigured as your requirements evolve. Also, because all of our wall systems are *non-progressive*, a door or window can be added or removed in the future without disturbing the adjacent materials.

**SAVE MONEY WITH IRS § 179:**

Section 179 is the provision of the US Tax Code for business equipment deductions and allows your business to deduct the full purchase price of equipment bought (and put into use) during the 2013 calendar year. Because of the inherent demountable nature of our products, they qualify for the substantial write-off of up to \$500,000. For example, a \$10,000 office could be written off completely for a savings of \$3,500 (assuming 35% tax bracket) making the office actually only cost \$6,500. This is a generous tax deduction which changes every year and is slated for drastic reduction. See [www.section179.org](http://www.section179.org) for up to date information and always consult a tax professional for potential ramifications.

**WHY INPLANT:**

The short answer is EXPERIENCE. We have been in business since 1987 with most of our staff having years of industry experience before joining our team. This means we have made our mistakes but learned from them and will pass this knowledge on to you when we design and implement your project. We also partner with some of the best material handling dealers in the country who can offer personalized solutions beyond modular offices.
